

## **Adjunct Math Instructor(s) Needed for FALL 2018 Semester**

North Country Community College is recruiting Adjunct Math Instructors to teach lower level mathematics to students who are incarcerated in local prisons, including, but not limited to, Pre-Algebra, Intro to Math Concepts, and Elementary Statistics.

Pre-Algebra is a developmental course for students who need to work on their basic arithmetic skills and an introduction to some basic algebra skills.

Intro to Math Concepts is a course that provides an overview of various areas of mathematics to students. Areas include an introduction to algebra, geometry, consumer mathematics, metric system conversions, and statistics.

Elementary Statistics is the introductory course to the area of statistics. Most of the course focuses on descriptive statistics and how to find the various calculations and then what those numbers mean in the context of the situation.

Candidates should have a minimum of a bachelor's degree in a mathematics area or a related field (with evidence of mathematics proficiency), a master's degree is preferred. Candidates with prior teaching experience are preferred and those with experience teaching developmental courses are highly needed. Candidates who can teach with limited to no technology access are preferred for teaching inside of prisons.

The successful candidate must successfully pass a State and/or Federal background check and is subject to the approval of the prison system for admittance into a prison facility.

For additional information about the position and teaching inside of a prison please contact Sarah Kilby at [skilby@nccc.edu](mailto:skilby@nccc.edu).

Please submit a cover letter, resume and three professional references to [vpaa@nccc.edu](mailto:vpaa@nccc.edu).
